

NEW

Studio ~ P-150

Light Riverside

Equipped with a high-quality audio system, the Studio P-150 is a perfect organ for both novice and experienced organists with high audio quality demands. This positive version of our well-known Studio 150, provides you an impressive and realistic pipe organ experience.

The organ has a sleek, tall cabinet, reminiscent of the consoles of many historical pipe organs. The lit drawknobs complete the design. The organ's sounds are amplified through speakers in the upper side of the console, which distribute the sound directly towards the organist's ears. The result? A natural and rich audio experience.

150 & 350

JOHANNUS

*A true Johannus
to fit any music room*

Studio
~
350

The Studio, one of the most successful organs in the Johannus family, is a complete, accessible and affordable organ that produces the world-famous Johannus sound. The Studio 150 and 350 bring organs within reach for both novice and professional organists.

Complete organ

The Studio is a complete organ that, like all other Johannus organs, produces a sound of the highest quality. We never compromise when it comes to our renowned sound; it's a matter of principle. The sound, the intonation, the reverb: they all have to be perfect.

Accessible to everyone

Nevertheless, the Studio is a very accessible and affordable instrument. We designed this organ, because we believe it should be accessible to everyone. For professional organists who practice and study every day, but also for amateur organists who are just getting their first lessons. The name says it all; the Studio is a real study organ. Whether you are looking to practice or to prepare yourself for accompanying the congregational singing in a worship service: this organ will be your loyal friend.

Sleek, compact console

The modern console boasts a sleek, compact design. The Studio will definitely not look out of place in a 21st-century music or living room. It comes in four beautiful colors: Light Riverside, Black North Wood, Nautilus Teak, and Wenge. Its fresh, modern design lets the Studio blend into any interior setting. Because it does not take up much space, the organ will also find a spot in smaller music and living rooms.

Signature sound

Thanks to the ingenious technologies used in the Studio 150 and 350, it is virtually impossible to hear any difference between this digital organ and a pipe organ. This primarily comes down to the high quality of sound, which we spend each day perfecting at Johannus. Even experts are unable to distinguish the sound of an authentic pipe organ from our digital organs. Partly due to our new, in-house technology, the purity and authenticity of the organ sound can be heard in each individual note. Thanks to our on-going quest to emulate the original pipe organ sound and to find the best way to reproduce that sound, our entire range of products will help you reach the pinnacle of musical artistry. As do this Studio 150 and 350.

Four styles

The Studio 150 and 350 feature 28 and 37 stops respectively, but the variety does not stop there. After all, each stop can be played in four different styles, and an 8' Röhrflute played in the romantic style sounds completely different than when played in the historical style. If you enjoy playing Bach, you will favor a baroque style, while Widor's compositions sound more natural in the symphonic style.

Twelve reverb programs

The Studio 150 and 350 each feature 12 unique reverb programs as well, which lets you augment your organ playing with virtually any acoustic effect that you could think of. You might imagine yourself playing in an intimate chapel, or even sitting at the manuals of an organ in an ancient cathedral. With a choice from four different sample styles and twelve reverb programs, the Studio gives you access to a wide range of pipe organs and building types within the four walls of your own music or living room.

Versatile and affordable

With all these possibilities, the Studio offers unparalleled versatility to novice and advanced organists. High-quality sound, respectable dispositions, various styles and multiple reverb programs, all packed in a compact console at an accessible price: the Studio in a nutshell. A true Johannus to fit any music room!

Nautilus Teak

Wenge

Black North Wood

With two manuals and a 30-note pedal board, the Studio 150 has a rich variety of options to offer both novice and advanced organists. It features 28 stops. Thanks to its modest dimensions, the instrument will take up minimal space. The Studio 150 is equipped with a high-quality 2.1 audio system, which will spread the brightness and clarity of the renowned Johannus sound to all corners of your music or living room.

With three manuals and 37 stops, the Studio 350 is the bigger version of the Studio 150. With the Studio 350, professional organists will have the perfect practice organ for their music and living rooms, but it also has a rich variety of possibilities to offer for novice organists. Solo stops such as the pan flute and trumpet can be used for hours of variation and experimentation with leading stops.

About Johannus

As one of the fastest-growing organ builders in the world, Johannus has garnered a loyal following of international music lovers over the past decades. Again and again, we find new ways to adapt a centuries-old phenomenon to today's needs, with great success. Every day, Johannus organs are shipped around the world, destined for amateur and professional organists alike, to churches, cathedrals, music and living rooms, conservatories of music, and concert halls. And wherever they go, people agree that the authentic

sound of the renowned pipe organs in our Johannus organs cannot be matched. Our global reputation is founded on this unparalleled sound quality, which is why today we export our organs to more than 100 countries. The 'kings of instruments' produced by our family business have played an important role on the world stage since the 1960s, and they will continue to do so in the future. The authentic pipe organ sound of our instruments will continue to capture the hearts of organists around the world.
